

# Document Title

Doc Writer <[doc@example.com](mailto:doc@example.com)> :reproducible: :listing-caption: Listing :source-highlighter: rouge

An example of a basic [AsciiDoc](https://github.com/asciidoctor/asciidoctor-pdf/blob/main/examples/basic-example.adoc) document prepared by [#https://github.com/asciidoctor/asciidoctor-pdf/blob/main/examples/basic-example.adoc](https://github.com/asciidoctor/asciidoctor-pdf/blob/main/examples/basic-example.adoc).

## Introduction

A paragraph followed by an unordered list<sup>[1]</sup> with square bullets.<sup>[2]</sup>

- item 1
- item 2
- item 3

## Main

Here's how you say “Hello, World!” in Prawn:

*Create a basic PDF document using Prawn*

```
require 'prawn'

Prawn::Document.generate 'example.pdf' do
  text 'Hello, World!'
end
```

## Conclusion

That's all, folks!

---

[1] AsciiDoc supports unordered, ordered, and description lists.

[2] You may choose from square, disc, and circle for the bullet style.
